## About Engravist

Organizing "International Printmaking Events", Engravist was founded in 2016 by Assoc. Dr. Lütfü Kaplanoğlu. The name Engravist was created by combining the English Word "engraving, scraping" and the "ist" suffix that makes it meaningful." The International Istanbul Engravist Printmaking Events" in scope and action is the first of its kind in Turkey.

With Engravist, an international symposium, numerous workshops and exhibitions have been organized since 2016. Besides the world-renowned artists and academicians, young artists also took part in the projects. In addition to that, social responsibility projects were also supported. Printmaking resources were created with the proceedings book and work catalogs.

Engravist printmaking activities aim to bring together national and international printmaking artists under the same roof and create a synergy in the field.

## INTERNATIONAL VIRTUAL ENGRAVIST PRINTMAKING BIENAL 2020

### // ABOUT PROJECT

The world's first virtual printmaking biennial was open on the 12th of June, 2020 with 54 countries, more than 600 artists and 7 virtual galleries.

People who closed themselves in their homes due to the pandemic process around the world have established more significant connections through the digital environment. Distances have disappeared in the world that has become a universal village within virtual networks. Along with many other fields, cultural and artistic activities also increased in digital environment. Art reflected once again its strength for giving people a dream of a better future.

Since establishment, Engravist has set out to transform the crises in general in the world in a positive way with the healing power of art, to contribute to the global communication and interaction cycle, to open way for its access to the international art environment and to create a dynamic synergy amongst artists from all over the world. International Virtual Engravist Printmaking Biennial brought together more than 600 artists from 54 countries in 7 virtual galleries.

It is the world's first virtual printmaking biennial

In 2018, it took the first step of the biennial by organizing an exhibition with around 250 works by 200 artists from 16 countries. The dream of Engravist for 2020 was to increase the number of artists and to reach more countries and to make a printmaking biennial. Due to the pandemic process in the world, this dream was brought to digital environment.

Called for artists with the "What would you like to say about a better World?" slogan, hundreds of artists from all over the world participated. As a result of the jury evaluations, the artists to take part in the biennial were determined. International Virtual Engravist Printmaking Biennial brought together art lovers in 7 virtual galleries with 54 countries, more than 600 artists. International Virtual Engravist Printmaking Biennial due to be opened on the 12th June 2020, became the first virtual art biennial in the world.

Art events at the international level allow, countries at closed poles and people unaware of each other, to create awareness about each other. In this context, the scope of meeting the global dimension with the power of the virtual environment is expanding. International Virtual Engravist Printmaking Biennial also offers artists the opportunity to present themselves at an international platform as an art event held on a local stage but moved into a universal level.
