

HENK VELDHUIZEN

PHOTOGRAPHER

PERSONALIA

After my Percussion study at the Royal Conservatory in The Hague, I dabbled in performing as a musician. I discovered that this was not my calling. That is how I ended up in music education.

THEATRE PRODUCTIONS

I taught percussion, keyboard and I coached pop groups. I also set up theatre productions, which was my big passion. For these productions, I was responsible for development, directing, design, costumes, story and all musical arrangements. This is what truly started my narrative and theatrical career.

PROJECT LEADER/MUSICIAN

Besides this, I lead the music group Alevare. With this small group of three to five people, we created shows where stories, paintings, poems or biographies were the common thread. All performances of this group were for charity.

CREATOR OF NARRATIVE AND THEATRICAL IMAGES

My passion for photography further developed at a later age. In my search for more creative development, I started working with artists from various disciplines. Aside from the combination of different art forms with photography, the synergy with the artist is crucial. That way, we combine our strengths and empower each other's artistic expression.

PEOPLE AT THE HEART

II love working with people and it shows in my work. When I work with an art painter, I use their work differently than I did in my collaboration with fashion designer Peter George d'Angelino Tap. But the person is always at the heart. A painting can strengthen the background and haute couture can be worn in many different ways. My theatre background and experience are very useful in this process. An interesting journey, which is still in progress for me. And on which various artists join me.

My work is regularly exhibited. More information can be found on [my website](#).
